

hSITE Annual Research Review

McGill University, Montreal

June 4 & 5, 2012

Call for Posters and Demos

Dear hSITE students,

You are invited to participate in a student poster and demo competition, highlighting the Network's recent research results. All will be reviewed by a team of judges. Four prizes (**BlackBerry PlayBook, 32 Gb**) will be awarded, to the top three student posters and the top demo.

The posters and demos will be evaluated based on technical content, visual presentation, and the presenter's ability to communicate the essence of the work. Each participating poster or demo must have one of the graduate student authors (preferably first author) in attendance to explain the work to judges and attendees.

Please confirm with your hSITE supervisor before submitting a poster or demo. Posters and demos should pertain to the research area covered by the hSITE mandate. (1 poster per student presenter; maximum 5 posters per researcher.)

The parameters of the poster must be no larger than **8 ft. wide by 4 ft. high** and the poster should include the hSITE logo ([download](#)). **Submissions that exceed these parameters will not be accepted for competition.**

Please submit a copy of your poster in PDF format, along with your submission information on the ARR website. A description of each demo should be emailed directly to tianzhaobing@gmail.com. There is no charge for this event, but please register as soon as possible, indicating whether you will submit a poster or demo in the competition. <http://hsite.mcgill.ca/ARR2012/userreg1.php>

The deadline for abstract (max. 300 words) and poster submissions is **May 28, 2012**.

Please contact Mr. Zhaobing Tian (tianzhaobing@gmail.com) if you have any questions regarding your poster or demo submission.

NOTE: Students are responsible for printing and submitting posters at the time of registration, and removing the posters and demos at the end of the session. (hSITE will not be responsible for lost or damaged posters/demos.)
